Work Experience

REFERSION

Associate Front-End Engineer   August 2021 - December 2022

Experience using React and Laravel with Javascript and PHP to write, update and deploy code to production on an enterprise-level affiliate marketing management application (14,000 users)

Developed an in-house reusable component Library using React Storybook. These components were utilized in a redesign of the entire application to showcase more robust and responsive data-tables and dashboards

Optimized existing code base with legacy code by modernizing functionality in React, adding test coverage, and updating responsive design using SASS architecture

Performed code-reviews and code-demonstrations, as well as being involved in sprint planning in an Agile (Scrum) environment with a team consistently exceeding sprint goals

Used JIRA and Confluence to create, scope and track bugs, new features and product improvements

Utilized Git workflow when working in local/dev environments using Docker Containers and AWS Kubernetes

Projects

DinnerFlix - www.dinnerflix.netlify.app

React app built utilizing GraphQL
    Decision paralysis is over with this Netflix clone that features ONLY the movie "My Dinner with Andre"

Education

🎓	**Columbia School of Engineering and Applied Science** Full Stack Web Development Certificate	2020 - 2021
🎓	**Bowling Green State University** Bachelor of Science, Visual Communication Technology	2003 - 2008

Skills

React, JavaScript, SASS/SCSS, Storybook, Tailwind, MySQL, Node, Express, PHP, MongoDB, GraphQL
